Project 7027

1) Describe the structure:

- the architecture of the structure is reminiscent of an old, colonial Spanish style (see sketch)
- structure is separated w/ possibly other structures on two sides.
- structure is very hard to access w/ a maze-like systems of alleyways or trails approaching structure.
- structure is surrounded on 3 sides by rugged mountains or tall steep cliffs w/ heavy vegetation. No vehicular access; foot trails.
- on 4th side, terrain gives way to a broad plain or lowland; water can be seen in far distance (10-30 miles).
- structure consists of open court yard or plaza surrounded by 2-story dwelling w/ reddish roof; square in shape; surrounded by heavy vegetation i.e. trees
- there is a gateway, but it is dysfunctional — leads nowhere.

#### 4) Interior of Target Structure:

- off of courtyard is a door.
- behind door is a low, dark passageway which slopes downward; (walls are thick)
- passageway leads to a room (see sketch)
- restricted access to room.
- there is a physical barrier, but this is easily bypassed
- the real barrier is hidden and detects <sup>(emitted energy)</sup> something
- a sense of a "booby trap" - something that could produce controlled destruction.
- little round discs with screen mesh; thumb nail size; are well hidden
- those near doorway into room are similar to those placed in ceiling throughout room; interior <sup>ceiling</sup> discs do not have the sense of destruction associated with them that those near the doorway [proper] do.
- interior of room is painted two colors; reddish floor / base boards; lighter wall / ceiling, reminiscent of stucco.
- \* - room size is approx 24' wide, 15'-18' deep and 13' high
- wooden table with weapons stacked on top sits right of doorway.

- room opens up further left than to the right
- \* - Corrugated cardboard boxes, 18" - 24" on a side are stacked along left wall, left rear corner; halfway across room to right
- boxes are stacked 2-4 boxes high; taped shut

## 2) Containers & contents

- boxes contain material similar to raw wool or pillow stuffing
- this fluffy material surrounds wrapped packages
- wrapped packages contain electronics, reminiscent of microchips.
- overall sense of illegality involved or that this is a clandestine operation.
- there is something very nasty about this stuff i.e. destruction, hurting, pain, etc.
- ultra secrecy of material; very few have knowledge
- contents held on to for some time i.e. weeks or months
- have military application
- there are others trying to prevent the movement or transfer of this material.

3) Personnel associated with structure:

- concerned individuals are not indigenous to locale; different from those who live there.
- highly skilled
- sense of structured scheduling
- different levels of intelligence / knowledge / expertise
- well stratified skill and tasking level
- skill levels are very distinct and unrelated.
- language of personnel is similar, but different, to surrounding people i.e. like Spanish is to Portuguese
- dark curly hair
- black eyes
- lighter skinned than surrounding groups.
- recently moved into area
- surrounding people do not know what is going on with structure's associated personnel
- surrounding people have deep rooted fear or superstition of newcomers

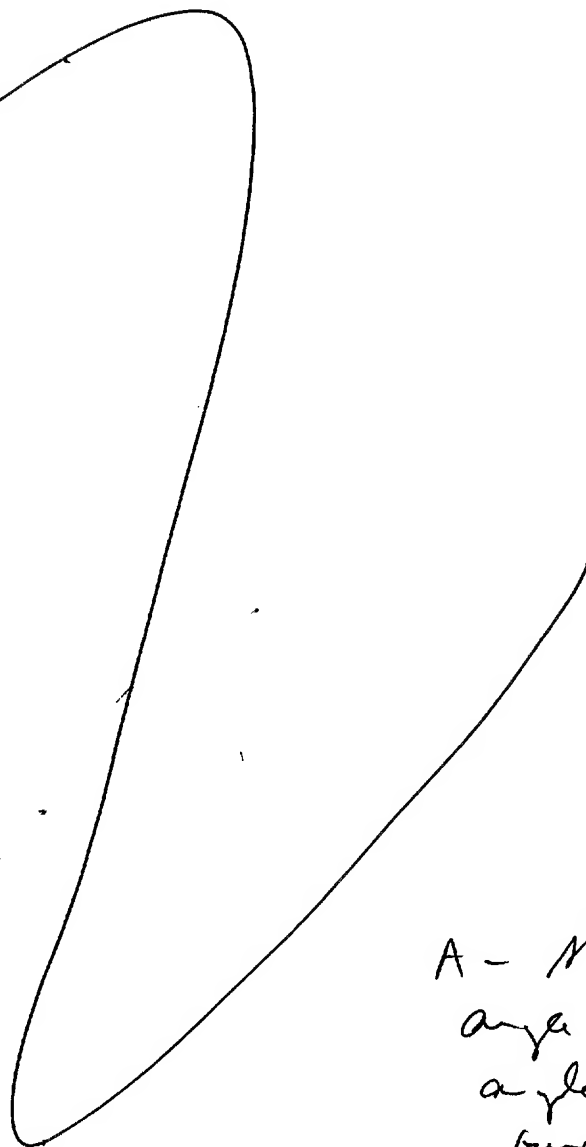

\* - Somebody is there part time; this person has knowledge of operation

- this person is very \$ / possession oriented; can be "bought-off".
- youthful male; 18-27 yrs old
- is trusted, but no particular reason why he is
- not real serious about anything
- wispy facial hair; doesn't have to shave much.
